

MVGS Field Preparation

Filling in the divots or 'holes' in the field

1. Loosen the dirt in the surrounding area with the rake 'finger' end using a vigorous back and forth motion.

2. Push the loosened dirt with the flat side of the rake into the divot.

MVGS Field Preparation

3. Level the fill dirt in the divot with the flat side of the rake using a back and forth motion.

4. Compress the dirt with the rake or the tamp using an up and down motion.
